

Save energy and reduce cost while maintaining safety

Garage lighting can be expensive, especially when used 24/7. Garage lighting with microwave sensor that detects people and vehicle presence to provide lighting where and when as needed, saving energy and reducing cost by up to 70%.

Benefits at a glance

- Energy-efficient LEDs and smart control technology reduce energy usage;
- With presence detection and zonal dimming, car park lighting activates when needed;
- LED lightings last longer and need maintenance less frequently;
